

Osprey Archers September 2009

Around 80 archers joined us for our annual fun shoot. As usual it was a 2X20 mixed 3D and faces, and once again we were lucky with the weather a bright sunny day made for the booking in area look almost like a village fete.

The double 3D targets were once again in use where the first circuit uses the further target and the second circuit the closer one, hitting the wrong target results in a minus 10 score. Mark decided to make this even more difficult by putting out 4 deer and it was left to the archers skill and judgement to decide which was the furthest, no clues were given, consequently there were a few minus scores on this one although a lot of archers were lucky enough to miss altogether and thus avoid the minus score.

We also had a skeleton which obviously could not be killed as it was already dead so in order to get a better score it was necessary to hit a small mouse or watch that were in the ribcage, the only snag was most people couldn't see them from the peg let alone hit them so we do like to make some of the targets a bit hard even though it is a fun shoot.

We would like to thank Tony Vowden for donating a special prize for the person having the most minus scores on his scoresheet, excluding Brian Hector who was trying but failed to get his score back to zero by hitting as many minuses as possible on the second circuit.

Full results and pictures can be found on our website www.ospreyarchers.org.uk
