

**Shoot report – Sunday November 16<sup>th</sup> 2014**

After a week or more of rain we had a welcome break for the open shoot on Sunday 16<sup>th</sup> November which was a blessing (although the hill to the top car park provided some unexpected and entertaining off roading experience).

60+ archers turned up for the shoot along with about a dozen of our own members, (several of whom had spent the previous day setting the course), and a wide variety of styles were in evidence.

Wally had put out a 36 target 3D shoot with some multiples, making 40 shots in total, all at reasonable distances, (apart from the few 'long' ones), so the overall scores were high.

Robo Duck (with the optional Chicken shot) was placed close enough to the tea tent so that we were able to hear the clang and rattle of smashed arrows throughout the day.

Hot refreshments were available all day under the control of Paul, Claire and Anne.

The day kicked off promptly at 9:30 and most people were on the way home by 2:30 despite being held up by the automatic gate being found closed. Many thanks to the person who unbolted the gate mechanism and then left it hanging! All that was need to make the gate open was to drive a little closer over the sensor and it would opened by itself which would have saved you (and me) a lot of trouble.

However, a good day was had by all and the comments about the course and arrangements made it all worthwhile.

Our dates for next year are now on the NFAS and club sites so we all look forward to seeing you again in the new year.
